The dispatches of General Sheridan, about the New Orleans riots, are attracting much attention and comment; they were fairly snoked out by Clymer and the Radical press, and it is believed Sheridan demanded their publication as a measure of justice to himself, since the only one of his dispatches given to the public bad been garbled in important particulars.

Editors Vedelle — Gentlemen: If in your opinion the following hastily writyour opinion the following hastily written remarks will serve any good purpose, they may appear in the columns of your spirited and valuable paper.

I had the pleasure of attending the onthusiastic meeting of the minors, and citizens held at the smelting works of the Alameda Mining Company at this place, which is under the able superintendence of Dr. O. H. Congar, a most estimable and accomplished gentleman, the proceedings of which meeting will doubtless be sent you for publication.

His Excellency Governor Charles

His Excellency Governor Charles Durkee, as had been previously announced, addressed the meeting in his most happy and effective manner. I welling upon the importance of thoroughly opening the miner and cultivating the fine farming lands in the valley a few miles distant, and also upon the moless important subject of beginning the moless. important subject of having the great mineral and agricultural in crests of the District and Territory represented at the World's Fair at Paris next spring,

The Governor himself is setting a good example in furnishing the means, and with Messrs. Butler and Duncan very thorough and reliable miners—opening several lodes of remarkable size and richness. There is a fortune in either one of the five loads they are de-

and of the collection of specimens fail-ly representing the mines of this most wonderful locality, for exhibition at that

recorder of the District, and several other gentlemen, all uniting in expressions of great confidence in the permanence of those almost boundless deposits of rich silver ore, and in the advantages of Pahranagat all things considered, as the best mining site yet discovered on the coutinent. One can but be thoroughly impressed with this conviction by surveying, as I have done, the immense mineral wealth upon the surface within a radius of five miles, from the outcroppings of the great Illinois lode on the top of Silver Mountain, with the fine valleys of agricultural and grazing lands in the distance.

The climate is delightful, and the

mines can be worked the year roundvery little snow or cold weather to im-pede operations. Cattle require no extra feed during the winter.
Supplies of all kinds of vegetables

and fruit are brought in from the settle-ments, together with most excellent beef, mutton and flour, thus rendering good, healthy and cheap living accessible to

Eastern capital will surely be attracted here when the advantages of profita-ble investment are fully known. It seems, and is in fact, the opening of a new field of mineral wealth in an old

new field of mineral wealth in an old settles country.

The formon people could hardly have received themselves or the Gentiles a desire service than by thus settling up and farming the country and lettles the vest deposite of the mountains remain in their rest mational banks until now when the Gentiles will surely and make a home market and pay fair prices be the services products that raised and ready for their consemption. The enterprise and skill displayed by Dr. Congan in the establishment and erection, as far as completed, of that wealthy Centile by works is worthy of all commendation.

miners and the satisfaction of the owners.

The Doctor has published a scientific and capital report of the miners of Pahrangas and capital logalities in the Berritory, which said devoties have a wide circulation, and has already met the eye of Eastern capitalists and enterprising men with whom he is extensively be quisinted, and I hope he will continue to favor the public with an occasional letter or report of matters as they prospect of the commentary of the fair (rather doubting about the other).

The miners resolved to collect a large amount of specimens which will be forwarded by the Commissioners by way of the Colorado river to New York.—Another collection will also be made from the miners as Meadow Valley and Minersville, to be forwarded with those from Cottonwood, Bingham Cahon, Grantsville and Rush Valley either to Omina or San Francisco for shipmant to New York or direct to France.

It hoped that the miners and mannifecturers will take an interest in the matter and furnish something in their line for the Great Exhibition, as evilances of the great apparent to matter and furnish something in their line for the Great Exhibition, as evilances of the great apparent to mail something in their line for the Great Exhibition, as evilances of the great apparent to mail to the great apparent to th

It is of much importance to the mining interests here as it is to Utah and Nevada that the Colorado should prove navigable to Callande, It wo further. Dr. Congar and Mr. Raymond, as well as the shipmers of San Francisco. well as the shippers of San Francisco evidently believed iv id is sa, for they purchased of that city mills and machine contracted with responsible abingers for the delivery of the same at Callville about the 1st of September and news has been brought here of the arrival of two steamers at Eldorado Caños cos some point on the river not far below, where for want of sufficient powers, they are tied up waiting for the too rapid current and high water to arbaide. It is asserted that at Collylle, the giver in a quarter of a mile wide with fifty feet of water and a current of eight or nine miles per hour in the channel. This certainly looks like a dealar of certain statements (interested probably) of the impossible anavigation of the impose ant river. These stramers will doubt-less deliver their loading at the above place as agreed upon, and thus settle

the question, it not, others will be built with the requisite draft and power to do so at any stage of water. Machinery for operating the actions defined the stage of ported by land only about one hundred miles and that over a good road directly up the Pahranagat Lake Valley.— There is a scarcity of water in the mines, veloping.

The meeting was also ably addressed by Dr. Congar, Mr. Mills, the agent of the Globe Company.
